Dear Parents and Carers,

We wanted to share an update about some changes to our school's settings for NumBots.

NumBots is an online maths platform that helps students with their mental addition and subtraction.

Your child has their own login details provided by the school, which can be found in your child's planner, to access the platform.

From 24th November, we'll have the following settings on our school's NumBots account:

- **Curfew:** Students won't be able to log in between 8pm and 7am.
- **Leaderboards:** Class and school leaderboards will not be visible.

These settings provide some helpful boundaries around NumBots use outside school. They may not affect your child's usual use of the platform at all, but it's useful to have them in place.

Why short, regular practice works
Short, regular practice helps number facts stick. The more often your child practises, the easier the facts become to remember, and spacing practice out gives them repeated chances to become more secure. We recommend three minutes, four or five times a week.

For more information, visit the NumBots Parent Page (https://numbots.com/parents-and-carers/).

Thank you for your continued support.

Kind regards,
Miss Holt
Maths Lead
